

PRODUCT FEATURE

GutterSupply.com • Circle 121

GutterSupply.com carries over 17 styles of snow guards for every application: cedar shake, asphalt, slate and metal roofing. Detailed information including custom layouts, cad drawings, installation specifics and more are available on the website. Preferred contractor accounts available for instant savings.

HotEdge Roof Ice Prevention • Circle 122

Manufacturer of the only UL Listed metal roof edge ice melt system in the

U.S.A., HotEdge Rail. Simple and proven effective to prevent ice dams and icicles from forming on any metal roof in extreme high snow load regions worldwide. The HotEdge Rail requires no modifications to existing roof structures and saves at least 30 percent on energy costs to operate over all other alternatives available. HotValley prevents ice dam problems in roof valleys. HotSeam designed for severe problematic areas on standing seam metal roofs.

Levi's Building Components • Circle 123

Levi's Building Components has developed a new and improved Snow Defender 4500. By adding an embossed groove to this time tested classic we have increased the rigidity by more than 40 percent. We have also added colors and now carry over 40 colors in stock. We ask you to use the Snow Defender 4500 with confidence because we stand behind it with our 15 year warranty. When you need quality snow guards fast, call Levi's Building Components. We ship most orders within 24 hours.
